Just finished reading through the email where you will put it all together with the mineral potential. Thanks again!

Cally, Here are maps with some of the individual data layers you were looking for. The first is Wilderness Study Areas. The second is Lands with Wilderness Character. There is still some project related LWC inventory work being done in the southwest portion of the monument so it will change. The last two maps show oil and gas and coal leases at the time the monument was established. We are s polygons depicting the landscape f e

Landscape Features

- The Grand Staircase
- Upper Paria Canyon system
- White Cliffs
- Vermilion Cliffs
- East Kaibab Monocline (Cockscomb)
- Burning Hills
- Kaiparowits Plateau
- Circle Cliffs
- Waterpocket Fold
- Escalante Natural Bridge
- Grosvenor Arch
- Upper Escalante Canyons
- No Mans Mesa - relic grasslands

When we get the mineral info we can produce a map with all four layers you requested. ed
